## About Us

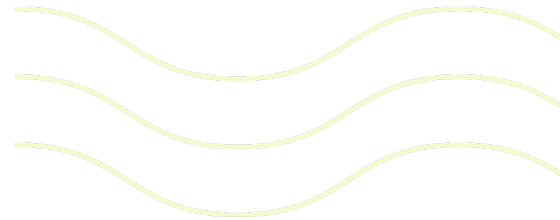

### Pure Aussie bulk spring water on-site, anywhere

At Aquapax, we understand that maintaining the safety and well-being of your workforce is paramount. In challenging and remote worksites, ensuring access to high-quality drinking water is essential. Our ecosystem of products is tailored to meet your industrial hydration needs, providing practical solutions for your team.

Since our establishment in 2012, Aquapax has been at the forefront of delivering innovative bulk drinking water solutions across Australia. As industry leaders, we are proud to collaborate with major players in mining, construction, and various sectors, extending our fresh drinking water supply services to locations throughout the country.

At Aquapax, we are dedicated to promoting a healthy and productive work environment by keeping your workforce cool and hydrated, no matter the challenges of your worksite.

## Our Product Range

### Aquapax 1000L Water Pods

The Aquapax 1000L water unit is ingeniously designed for ultimate water protection and convenience. Enclosed within a robust octagonal cardboard outer casing, it houses a scientifically engineered inner-liner barrier bag. This inner liner is meticulously crafted to shield the encapsulated water from potential environmental contaminants, ensuring its freshness and purity.

These Water Pods weigh 1090kg and are conveniently placed on a standard 1165mm x 1165mm non-returnable pallet, eliminating the need for specialised handling during transport and storage. This adaptable unit can be seamlessly integrated into various site infrastructures via a 3/4-inch BSP outlet. This versatile feature allows for direct connection to our drinking fountains, delivering crisp, ice-cold water for immediate consumption. Alternatively, it can be plumbed into crib rooms or other on-site structures. The AP1000 water pod serves as a modular component, forming a vital part of a comprehensive on-site safe drinking water solution.

### Products That Compliment Our 1000L Water Pods

#### Water Coolers

Designed to compliment our 1000L water pods, Aquapax provides water coolers for sale or hire, ensuring your workforce has access to chilled and refreshing water throughout the day. These coolers are easily connected to our water pods, providing a convenient solution for your team.

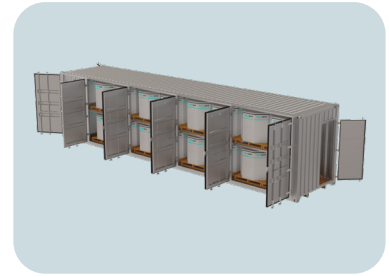

#### Constant Pressure Pumps and Plumbing Parts

To maintain water quality and compliance with Australian standards, Aquapax offers a range of food-grade constant pressure pumps and plumbing components. These ensure that water from our 1000L water pods is distributed safely to your appliances.

### Modified Containers

Aquapax specialises in modified containers that store and pump our 1000L water pods to potable water infrastructure. These solutions are designed for efficient water distribution in remote areas and challenging worksites. Our containerised systems incorporate advanced technology to provide a reliable source of high-quality water, even in the most demanding conditions.

### Aquapax 5L Casks

Aquapax 5L Water Casks offer a distinctive, bar-fridge-sized solution for revitalising spring water, all while significantly reducing plastic waste by an impressive 80%. These casks are thoughtfully packaged in sets of three, providing a total of 15 litres of pure water in each carton. With 60 cartons thoughtfully arranged on a single pallet, you get the convenience of 900 litres of water, making it the ideal choice for those seeking larger water volumes in an eco-conscious and space-efficient format.

#### Product Features:

- Unique bar-fridge-sized box containing five litres of premium spring water.
- Innovative recyclable packaging dramatically reduces plastic waste by 80%.
- Casks are conveniently packaged in sets of three, resulting in a total of 15 litres per carton.
- Each pallet consists of 60 cartons, offering an impressive 900 litres of water in a compact form.
- Designed to meet the demand for increased water volumes without compromising on sustainability.

### Our Services

**Bulk Water Cartage:** Aquapax extends its services to bulk water cartage of spring water, with the capacity to transport up to 64,000 litres at a time. Our experienced team ensures the safe and timely delivery of large water volumes to your remote sites, addressing your specific water supply needs.

## Why Partner With Us?

Aquapax is a registered and preferred supplier to some of the biggest names in Mining. Our products are currently in use across the biggest mining sites in Australia. We have a proven track record of quality customer service and supply agility, and we make it our mission to deliver our product on time and according to our customer's requirements.

### Extensive Experience with Large-Scale Workplaces

With years of experience, Aquapax has become a trusted partner for large-scale workplaces across various industries. Our proven track record demonstrates our ability to meet the demanding water supply requirements of some of the biggest names in mining, construction, and beyond.

### Bag-in-Box Technology

Aquapax embraces cutting-edge bag-in-box technology to provide bulk drinking water solutions that are both eco-conscious and convenient. Our bag-in-box packaging format ensures the purity and freshness of our spring water, making it an ideal choice for challenging environments.

### Purity & Taste

At Aquapax, we are obsessed with water quality. Our commitment to providing water that not only meets but exceeds taste and purity standards sets us apart. You can trust Aquapax for refreshing, crisp, and consistently high-quality water.

### HACCP Certified Facilities

Our facilities are certified under Hazard Analysis and Critical Control Points (HACCP) standards, ensuring that our water products are produced and handled with the utmost care, hygiene, and safety. This rigorous certification backs Aquapax's dedication to quality.

### Independent NATA Testing

We take quality assurance seriously. Aquapax conducts independent testing through the National Association of Testing Authorities (NATA). This ensures that our water consistently meets stringent quality and safety standards, giving you complete peace of mind.

### Sustainability (We Help Large Companies Reduce Hydration-related Waste)

Sustainability is at the core of what we do. Aquapax provides large companies with sustainable bulk water solutions, reducing the need for single-use plastic bottles and minimising waste. By choosing Aquapax, you contribute to a more environmentally responsible future.

### APCO Member

Aquapax is proud to be a member of the Australian Packaging Covenant Organisation (APCO). Our commitment to sustainable packaging aligns with APCO's goals, promoting environmentally responsible practices in the industry.

### One Stop Shop

Aquapax is your comprehensive solution provider for all your bulk water needs. No other water supplier offers the diverse range of services and products that we do. From water pods and casks to containerised solutions and bulk water cartage, Aquapax is your one-stop shop for industrial hydration solutions.

## Our Experience

### Supplying the best spring water to remote places

At Aquapax, we take great pride in servicing a diverse range of clients from various industries. Over the years, we have had the pleasure of working with a spread of great clients. These case studies showcase our ability to deliver top-notch products and services while remaining committed to our core values.

#### Case Studies

##### A compact hydration solution needed for top-tier trains

A top-tier mining client required a compact drinking water solution that would fit in their train cab mini-fridges. Aquapax developed a bespoke design, compact 5L drinking water cask. Casks are delivered to our client on a pallet where filled packaging maximises pallet space.

##### 800 personnel shutdown for a top-tier miner with urgent drinking water needs

A top-tier mining client had a looming shutdown with 800 personnel due to arrive on site. Unfortunately, there was insufficient infrastructure to supply safe drinking water demands of that number of people. A total of 90 Aquapax 1000L Water Pods (that's 90,000L total of fresh Australian spring water) was dispatched to the mine site over a 1.5 month period.

##### Aquapax pumping station

Our client, a remote mining camp in Australia's Northwest, faced the challenge of providing a high volume of safe and high-quality drinking water to its workers. Aquapax assisted the client in designing a spring water pumping station that utilises our 1000L Water Pods. The system consisted of a 40" sea container, racking, a constant pressure pump, and simple pipework. This resulted in a 16,000-litre system capable of delivering a high volume of pure Australian spring water to a whole mining camp.

# Safety and Compliance

## Supplying the best spring water to remote places

At Aquapax, our unwavering commitment to safety and the well-being of our customers and workforce stands as a cornerstone of our operations. We take immense pride in offering hydration solutions that not only meet but consistently exceed the highest industry standards. Our state-of-the-art equipment and packaging, complemented by our HACCP accreditation, ensures that every single drop of water we deliver aligns seamlessly with the rigorous guidelines established by Food Standards Australia NZ.

### Safety and Compliance Excellence

Our entire operations, spanning processing, logistics, and more, adhere to the most stringent health and safety controls in the spring water industry.

### Best-in-Class Packaging

Aquapax employs cutting-edge bag-in-box spring water packaging that is not only environmentally conscious but also entirely BPA-free. All components that come into contact with our drinking water are rigorously approved for use in Australia, meticulously adhering to the Australian standards.

australia's most trusted water supplier

# Sustainability

## Protecting our people and the planet with greener packaging solutions

Aquapax understands that sustainability is an ongoing process, not a destination, and we are dedicated to protecting our planet and its people through sustainable packaging solutions.

Our commitment to being sustainable water suppliers is evident in every aspect of our operations. We work with fewer resources and collaborate with other industry leaders to remain competitive while making a positive impact on our employees, communities, and the Earth.

## Problems worth solving

We believe that reducing plastic waste and promoting sustainable packaging solutions is essential to protect our planet’s health and wellbeing. Our commitment to being a sustainable water supplier is actioned through our use of eco-friendly materials and minimising our carbon footprint helps us ensure that our products are not only safe and healthy for consumers but also for the environment.

## Where We Work

At Aquapax, our commitment to delivering pure hydration knows no boundaries. We proudly extend our services across a diverse spectrum of industries, including mining, construction, defence, emergency services, remote communities, events, and beyond. With Aquapax by your side, you can trust in the consistency and purity of our hydration solutions, ensuring that wherever you are, your access to pristine water is never compromised.
